## CONTRACTOR SUPPLY UPDATE -

### A.D.O BAFFLES IN STOCK NOW!

**Climatizer Insulation is proud to supply roofing and insulation contractors with ADO Baffles for residential construction, including the #1 selling Baffles Durovent® and the Provent®.**

*Durovent® Flat, 16', and 24"*

*Provent® 16" and 24"*

Insulation contractors know that the way to achieve a proper building envelope where the attic is concerned is by achieving the right combination of insulation and ventilation. It is the magic that makes all the difference and quality baffles are essential to making this happen.

Benefits of a well-ventilated attic include:

- Improves insulation efficiencies
- Helps reduce ice-dam formation
- Cooler attics in summer months
- Aids in prolonging shingle life
- Helps avoid shingle blistering
- Drier attics

**A·D·O®**  
PRODUCTS YOU NEED. SERVICE WE DELIVER.

Contact our Sales Reps today to find out more about our Baffle offerings to enhance your ability to serve your customers better. [info@climatizer.ca](mailto:info@climatizer.ca)  
Subject: Baffles

Look for these and other insulation blowing/spraying contracting supplies **COMING SOON** to our expanding website! [www.climatizer.ca](http://www.climatizer.ca)

## "Baby, It's Cold Outside" - Ice Damming and Insulation

"Baby, it's cold outside" and with that intense cold weather comes new challenges for homeowners, especially those in older homes or homes with insufficient, poorly distributed or poorly ventilated attics in the form of what is known as 'ice-damming'.

Ice damming can cause all kinds of problems for an roof and truss structure, leading to water damage, and harm to roofing materials. Most importantly, it is a tell-tale sign of heat loss which means not only comfort is finding it's way out of the roof, but also energy - and energy means money for home or building owners! The heat loss melts snow-laden attics, causing water to drip and freeze as ice and icicles, known as ice dams.

One of the most basic ways good insulation protects a home is by keeping the cold air out and warm air in during the cold winter months, and the opposite during the summer. Controlling these temperature extremes, is one of the main benefits of cellulose insulation, proper ventilation, in a skilled installation. Roofers and insulation contractors have the ability to educate homeowners, and provide the service needed to prevent this from happening to ensure Canadians get the longevity out of their homes that they deserve for their hard won dollars.
